

Exams-Boost

- ✓ Online Tool, Convenient, easy to study.
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Offline Anytime

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 90 days after purchasing. And Free get any another product.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

Provides everything you need to prepare and quickly pass the certification exam a first attempt.

Exam : **NS0-303**

Title : NetApp Certified Hybrid Cloud
- Administrator

Vendor : Network Appliance

Version : DEMO

NO.1 On your FAS8200, you execute the storage aggregation modify-aggregation* s-isinactive-data-reporting-enabled true command.

- A. It enables you to show inactive data on all hybrid aggregates.
- B. It enables you to show inactive data on all HDD aggregates.
- C. It enables you to show inactive data on all flash aggregates.
- D. It enables you to show inactive data on all aggregates.

Answer: C

NO.2 You have an AFF A800 and are tiering data into StorageGRID. You need to keep a second copy of the cold data in an S3 bucket within AWS.

In this scenario, which two NetApp technologies would you use? (Choose two.)

- A. CloudMirror
- B. Cloud Sync
- C. SnapMirror
- D. FlashPool

Answer: A,C

NO.3 What are two network requirements when providing an unused IPv4 CIDR block when onboarding to Cloud Volumes Service for AWS? (Choose two.)

- A. an ExpressRoute gateway
- B. a /28 network
- C. a private static IP block for shares and exports
- D. a public elastic IP block for EC2 instances accessing shares

Answer: B,C

NO.4 You are the administrator for your company's Azure infrastructure. You need to create a custom role to ensure that you can deploy Cloud Volumes ONTAP without using NetApp Cloud Central.

Which modification do you need to make to the 1SON file to accomplish this task?

- A. Add the Azure GUID.
- B. Modify the Azure IAM policy.
- C. Add the Azure Subscription ID.
- D. Modify the Azure VM I

Answer: C

NO.5 You are administrator of your company's ONTAP storage systems. You activated the inactive data reporting on your SSD aggregates.

After 31 days, you see no output from the ~volume show -fields performance-tier-inactive-user- data, performance-tier-inactive-user-data-percent~ command.

In this scenario, which statement is correct?

- A. The tiering policy of the volume is set to ~backup~.
- B. The tiering policy of the volume is set to ~snapshot-only~.
- C. The tiering policy of the volume is set to ~none~.

D. The tiering policy of the volume is set to ~auto~.

Answer: A

NO.6 You want to set up data protection from your on-premises AFF A800 to Cloud Volumes ON TAP with 14 days retention and an hourly refresh rate.

In this situation, what should you do to accomplish this task?

- A. Set up a Snapshot with a 1-hour update and a retention of 14 days with ONTAP 9.3.
- B. Set up a SnapVault from source to destination with an 1-hour update and retention of 14 days with ONTAP 9.3.
- C. Set up a SnapVault from source to destination with an 1-hour update and retention of 14 days with ONTAP 9.3.
- D. Set up a Snapshot with a 1-hour update and a retention of 14 days with ONTAP 9.4.

Answer: C

NO.7 You are the administrator for your company's public cloud system. As you are deploying OnCommand Cloud Manager, you notice that each time you try to deploy a Cloud Volumes ONTAP Instance, you receive an access denied message in the log file. In this scenario, what must you do to solve this problem?

- A. Reset OnCommand Cloud Manager to the default permissions
- B. Apply the security policy from NetApp Cloud Central
- C. Set the security permissions from the AWS support site
- D. Set the security permissions from the NetApp Support site

Answer: A

NO.8 Which two services do you need to configure before you provision CIFS access in Cloud Volumes ONTAP? (Choose two.)

- A. Active Directory
- B. FPolicy
- C. ONS
- D. NIS

Answer: B,C

NO.9 You want to use FabricPool on your AFF A300.

In this scenario, which three tiering policies show inactive data on your volumes? (Choose three.)

- A. backup
- B. mirror
- C. none
- D. auto
- E. snapshot-only

Answer: A,B,E

NO.10 You have deployed a Cloud Volumes ONTAP Multi Availability Zone HA instance into your AWS account. After deployment, you are unable to connect to the data LIF using NFS, SMB, or iSCSI. Which configuration setting would you verify to ensure that access to the data LIF is allowed?

- A. Active Directory permissions
- B. Security Group
- C. Cloud Manager User permissions
- D. Network Access Control List

Answer: B

NO.11 You are creating a volume in your AWS Cloud Volumes ONTAP instance. You have 50 TB of user unstructured data.

For this workload requirement, which AWS disk type would you deploy?

- A. S3
- B. Glacier
- C. EFS
- D. EBS

Answer: B

NO.12 A cloud administrator is unable to connect to an iSCSI LUN that is running in an AWS Instance of Cloud Volumes ONTAP. The cloud administrator notices that the VPC Security Group does not include any outbound TCP rules.

In this scenario, which outbound TCP port would you enable to access the LUN?

- A. 2049
- B. 445
- C. 111
- D. 3260

Answer: D

NO.13 Which two elements should be configured for a VPN connection in AWS? (Choose two.)

- A. Internet gateway
- B. NAT gateway
- C. customer gateway
- D. virtual private gateway

Answer: A,B

NO.14 You have SnapMirror connectivity issues between two Cloud Volumes ONTAP clusters. Which advanced ONTAP command would you use to troubleshoot and test replication connectivity?

- A. network ping
- B. cluster peer ping
- C. cluster ping-cluster
- D. vserver peer show

Answer: D
